Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those

models, and an explanation of the rating system? Yes

Website address: <http://www.southernlinc.com/privacy/wireless-accessibility/hac.aspx>

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: SouthernLINC maintains handset marketing materials, for use by its direct sales force, company owned stores, and authorized dealers, that clearly indicates which handsets are HAC rated. SouthernLINC's Internet includes clearly labeled and easily linked to pages listing available handsets, the handset's "M" and/or "T" rating, and a description of the handset's functionality classifications and targeted or likely end user groups

Methodology for Functionality Levels

Handset functionality is determined by factors including, but not limited to, technical specifications, ergonomic features, retail price, Internet capability, the impact and/or water resistance capability of its casing, power level, and targeted or likely end user group.
